

Getting Unstuck from Legacy Integration Technologies

90%

of IT business leaders, most from large enterprises, say that legacy systems are holding them back from harnessing the digital technologies they need to grow and become more efficient.

30%

say that legacy systems are a barrier to successful project implementation. Furthermore, the path to success and digital transformation is hindered.

3 Reasons Why Businesses are Stuck with Legacy Technologies

Cost

"Let's say your company invested \$500,000 in its legacy system in 1997. Today, it's no longer meeting your needs, but replacing it might cost one million dollars."

— ESJ

Time

"Replacement may require several years given the complexity of the system."

— Fronckowiak, Pace University

Integration

"The biggest challenge is to integrate new tools into existing legacy technologies rather than having to start over with a completely new platform."

— Forbes

Liaison Embrace & Replace Program: A Low-Risk Way to Get Unstuck from Legacy Integration Technologies

Liaison's Embrace & Replace Program allows organizations to:

Untangle integration operations from deeply embedded on-premises or in-network integration and middleware environments

Minimize disruption and risk

Maximize value

Enable a modern, future-proof, cloud-based solution built for flexibility, extensibility, and scalability

Liaison's Two-Pronged Approach

Embrace

untangle integration operations from deeply embedded on-premises or in-network integration and middleware environments

- Alleviate significant overhead
- Concurrently extend existing significant investments
- Leverage Liaison's managed services

Replace

integration operations with the advanced, award-winning Liaison ALLOY® Platform and be able to:

- Gradually extend to the ALLOY cloud platform
- Ultimately migrate all data operations to the ALLOY Platform

Benefits

- ✓ Migrate to a modern, future-proof platform
- ✓ Achieve seamless transition with minimal risk and disruption to your business
- ✓ Leverage Liaison's data experts and best practices
- ✓ Complete transition in a reasonable timeframe
- ✓ Experience compelling value and predictable costs
